Dear Sir,

INTRODUCING EDUSOFT FOR SCHOOL MANAGEMENT

We hereby introduce our school management software, *EduSoft*, to you. Whether you have an existing educational software or not, please take a look at what *EduSoft* offers.

EduSoft is a topmost educational software which offers a lot of unmatched benefits for schools, colleges and similar institutions. It is the leading platform for connecting and collaborating with students, parents, and teachers and it solves the following challenges with school management:

Challenges that EduSoft solves

1. **Registrations and Admissions:** Parents and students are wasting their precious time standing in queues filling applications forms and paying fees. *EduSoft* has a registration form for parents and students to fill in the comfort of their homes. Also evidence of fees payment could be sent using the Contact Us form. All at the landing page of *EduSoft*.
2. **Limited to certain number of exams:** *EduSoft* allows you to define exams without any limitation and optionally include these in the various created results(mid-term, end-term etc)
3. **Result production:** You are not limited to any number of results in *EduSoft*. Also scores are collated seamlessly and you can re-collate scores where there are errors without any data restore.
4. **Inability to generate results quickly:** *EduSoft* helps you to get results ready before students go on vacation. It does this by removing the hassles in entering, collating and grading exam scores. Recording attendance is also seamless in *EduSoft*.
5. **Key-man issues:** *EduSoft* ensures that you do not rely on a key-man without which school results cannot be produced.
6. **Class Room Management:** *EduSoft* has the most flexible attendance structure to track absentees. It also helps solve indiscipline and behavior issues by keeping records of these.
7. **Student/Parents Engagements:** *EduSoft* has a well-developed student portal to enable effective engagements with students and parents. Included in this portal are Contact Us and Announcement forms.
8. **Monitoring student progress:** There are several provisions to monitor student progress in *EduSoft* and all these are available to parents to access through the web portal in the comfort of their homes.
9. **Student Billing Management:** *EduSoft* has a flexible fees structure. It helps with billing and generate bank-like statement of account for students.
10. **Lack of Technological Infrastructure:** You do not need any local infrastructure to run *EduSoft*. It is a web based hosted software.
11. **Data Migration and Integration:** We shall help you with your data migration into *EduSoft*. Hence, no loss of historical data
12. **Cost Constraints:** Our aim is for you to use *EduSoft*. Hence, very cost effective and highly competitive. Be assured cost will not be a barrier to using this software.
13. **Training and Capacity Building:** We have a well developed user manual. Our help facilities are there also to give 24x7 help. We shall hand-hold you in implementing *EduSoft*.
14. **Data Security and Privacy Concerns:** Access to *EduSoft* is on need to know basis. We comply with all data laws.
15. **Adoption:** Adoption is based on what is in need for me. All stakeholders(student, parents, teachers, administrators) stand to benefit by using *EduSoft*.
16. **School finances:** Managing finances is a breeze here and *EduSoft* helps you with debtors list easily. It has a full-fledged Financial Modules to help you with your complete accounting system. Hence, *EduSoft* manages your fixed asset, inventory, purchases and sales, other services etc and generate Trial Balance and other financial reports.

Please note the following regarding EduSoft:

1. It is not new. It was developed in 2018 and used by a lot of schools and feedback has been wonderful. We continue to upgrade it to take advantage of latest technology.
2. As data analysts, we also give specialized training on how to analyse the data in *EduSoft* in order to assist management in decision making.
3. You do not need any local infrastructure to support your access to *EduSoft*. Just login as if you are accessing your email
4. You have all the functionalities of *EduSoft* on phone and tablet devices.
5. You are assigned a sub-domain as a user of *EduSoft*(e.g wittymind.abaycafe.com). Hence, you have a separate database and other facilities and not lumped together with other users of the software
6. For schools with hostels, we have a full-fledged software for apartment management, *ProSoft*.

<u>MISSION AND OBJECTIVES</u>	<u>EDUSOFT FUNCTIONALITIES</u>
<p>Our mission for developing this software is “...reduce the pains and headaches of educationists by creating a simple, yet robust, web solution”.</p> <p>This mission is in tune with the vision of System Consult, the developer of EduSoft, which is “..using technology to solve business challenges”.</p> <p>Towards this end we have these objectives for developing this software:</p> <ul style="list-style-type: none"> • Make management focus on what is more important, strategy. • Provide a simple, yet robust, web solution • Flexibility and ease of use • Improved student/parent engagements • Better management control • Simplify operations and minimize processing errors • Provide a single source of truth • Reduce clerical work and cost of operations • Reduce risk of data exposure to unauthorized persons 	<ul style="list-style-type: none"> • Student Registration and Enrolment • Student Attendance, Discipline, Awards, Exits, Transfers etc • Fees Payments by students and printing of receipts • Score Capture and collation of scores • Easy grading of scores • Student Subjective Assessments/Comments • Production of Result Slips • Making queries and generating output • Easy online access to student performance from the comfort of their homes • Capturing of expenses incurred in running the school • Bank Lodgments and other funds transfer • Expense amortization and accrual • Asset depreciation • Inventory management • Service Requests management • Flexible access management • Having periodic backups • Trial balance, profit and loss report etc

HOW DIFFERENT

The question is, how is *EduSoft* different from other school management software? Highlighted below are some of the differences:

Feature	Comment																				
<p>Result Setup</p>	<p>You have more flexibility in result definition as indicated below:</p> <ul style="list-style-type: none"> • Report Templates(Color Scheme and Report options) • Result Types(Mid Term, End of Term etc) • Setup of various exam and exam weights in the various Result types. <p>Hence, you have the flexibility of creating different result types as some schools issue mid-term results and other result types in addition to end-of-term result.</p>																				
<p>Result Sheet</p>	<p><i>EduSoft</i> gives you the options below for result sheets. Hence, their settings are dynamic. Meaning that you could set these by yourself:</p> <table border="1" data-bbox="311 1803 1460 2094"> <thead> <tr> <th data-bbox="319 1809 885 1836"><u>Result Options</u></th> <th data-bbox="893 1809 1452 1836"><u>Result Color Schemes</u></th> </tr> </thead> <tbody> <tr> <td data-bbox="319 1836 885 1863">Show Attendance</td> <td data-bbox="893 1836 1452 1863">Title Color</td> </tr> <tr> <td data-bbox="319 1863 885 1890">Show Age</td> <td data-bbox="893 1863 1452 1890">Caption Color</td> </tr> <tr> <td data-bbox="319 1890 885 1917">Use Class Stamp</td> <td data-bbox="893 1890 1452 1917">Text Color</td> </tr> <tr> <td data-bbox="319 1917 885 1944">Use School Stamp</td> <td data-bbox="893 1917 1452 1944">Table Border Color</td> </tr> <tr> <td data-bbox="319 1944 885 1971">Show Photo</td> <td data-bbox="893 1944 1452 1971">Table Header Color</td> </tr> <tr> <td data-bbox="319 1971 885 1998">Print Only Exams</td> <td data-bbox="893 1971 1452 1998">Table Header Background</td> </tr> <tr> <td data-bbox="319 1998 885 2024">Print Only Assessments</td> <td data-bbox="893 1998 1452 2024">Score Grade Color</td> </tr> <tr> <td data-bbox="319 2024 885 2051">Show Class Position</td> <td data-bbox="893 2024 1452 2051">Score Grade Background</td> </tr> <tr> <td data-bbox="319 2051 885 2094">Use Pre-Printed Sheets(This is where you are printing)</td> <td data-bbox="893 2051 1452 2094">Grade Remarks Color</td> </tr> </tbody> </table>	<u>Result Options</u>	<u>Result Color Schemes</u>	Show Attendance	Title Color	Show Age	Caption Color	Use Class Stamp	Text Color	Use School Stamp	Table Border Color	Show Photo	Table Header Color	Print Only Exams	Table Header Background	Print Only Assessments	Score Grade Color	Show Class Position	Score Grade Background	Use Pre-Printed Sheets (This is where you are printing)	Grade Remarks Color

on paper with existing letter head).	Grade Remarks Background Failed Subject Color Failed Subject Background Total Score Color Total Score Background Score Text Color		
Student Portal	<p data-bbox="312 421 1469 450">You have a well-developed student portal and this gives opportunity for students and guardians to access <i>EduSoft</i> for:</p> <ul data-bbox="312 456 1469 831" style="list-style-type: none"> • Statement of account of fees charged and paid • School academic calendar • School subjects and classes • Enrolment history • Exam scores • Exam results • School Announcement • Contact Us: This is enables parents to send evidence of school fees payment rather than physically coming to the school to give evidence. Note also that the Contact Us form is also at login page. Hence, guardians need not sign on to <i>EduSoft</i> to contact the school. • etc <p data-bbox="312 864 1469 913">Though there is a form for Portal registration, students(those with email addresses) are automatically registered upon class enrolment after registration.</p>		
School Assessments	<p data-bbox="312 913 1469 976">In addition to entering exam scores for students, you have the option of assessing students on non-exam criteria. For some pupils(e.g Pre-Nursery, Nursery), this is the only result.</p> <p data-bbox="312 983 1469 1012"><i>EduSoft</i> gives you the option of using keys for this assessment.</p> <p data-bbox="312 1019 1469 1032">Then you have the flexibility of copying the previous ratings and editing these for students.</p>		
Favorites	<p data-bbox="312 1032 1469 1095">The favorites section allows easy access to commonly used forms. Hence, these forms are available at login based on defined user access:</p> <ul data-bbox="312 1102 1469 1368" style="list-style-type: none"> • Class enrolments • Exam Scores • Fees Payment • Student Registrations • Student Attendance • Student Assessments • Result Collation • Reports Generation etc <p data-bbox="312 1402 1469 1429">You therefore do not need to go through various navigations to use these basic functionalities.</p>		
Contact Us	<p data-bbox="312 1429 1469 1491">The Contact Us is a full-fledged application allowing you to be contacted by just everyone and allowing you to respond as appropriate.</p> <p data-bbox="312 1498 1469 1527">The various contact types should be defined by you. Though we have done some initial setup.</p> <p data-bbox="312 1534 1469 1576">As explained earlier, guardians could use this form to send evidence of payment of fees and other contact matters without necessarily visiting the school.</p>		
Fees	<p data-bbox="312 1576 1469 1671">The fees module allows you to charge defined mandatory fees and optional fees for a class in a more flexible way. You simply go to the appropriate forms(Mandatory/Optional) and all the fees for each student would show up and you have the option of changing these as shown in the screen shots below.</p> <p data-bbox="312 1677 1469 1753">You could run this process as many times as possible without restoring from previous backup and without duplication. The Statement of account is available as student drop-down option or in the Report module. This allows you to generate statements, similar to bank statement, for students.</p>		
Class Enrolment Form View	<p data-bbox="312 1753 1469 1816">There is a drop down for each student in a class to perform the following actions when you are in the view mode of Class Enrolment Form:</p> <ul data-bbox="312 1823 1469 2051" style="list-style-type: none"> • Transfer: to another class • Exit: from the school • Sanction: the Student • Charges: to charge optional fees • Payment: of school fees • Refund: of excel fees • Statement: to generate statement for this student etc 		

Feature	Comment
Exam Scores	You have the option of entering exam scores per subject for a class or all the subjects for all the students in a class at once. No limit to number of exams in <i>EduSoft</i> .
Attendance	It is most convenient entering student class attendance with <i>EduSoft</i> . Note that you have the option of showing this attendance in the result sheet.
Student Registration	There is the flexibility of self-registration. Hence, students could apply online and load their passport photographs. The next step after self-registration is to assign a Registration Number and enroll the student in a class using the Class Enrolment Form. Access to the Student Portal is automatically created at this point. Please use the Portal Form in the Student module to enroll existing students in the Student Portal.
Queries and Reports	For those who are data analytics inclined, the query/query module gives you limitless reports as defined by you, not as pre-defined by the developers. There are also various reports to meet your needs.
Dashboards	<i>EduSoft</i> provides you with stunning dashboards to quickly draw you attention to certain anomalies that would have escaped your attention. This includes subject per class, class enrolments, fees payments, fees defined for a class, students owing, expenses, purchases etc
General Ledger	<i>EduSoft</i> is a full-fledged accounting system. This helps to manage your purchases, sales, inventory verification. Some companies use only this module for their financial transactions.

Please book for a demo using the [Contact Us](#) form on our web page.

I look forward to presenting, either virtually or in-person, *EduSoft* to your school at your earliest convenience.

Please let me hear from you.

Yours faithfully,

Abayomi Folorunsho, FCA
CEO
